

MOVING WALLS

MOVING PANEL

The magnetic, writeable Moving Panel is a versatile and helpful tool in agile work environments. The waferthin, frameless panel is available in two functional sizes and can effortlessly be attached to the extensive Moving Wall. Alternatively, the lightweight Panel can be used as a stand-alone writeable presentation surface on the wall by means of a rail-system. Placed as a piece of paper on a table, it is responding perfectly to the requirements of highly flexible working environments and methods. The mobile panel comes with the same high-end surface as the Moving Wall and is an ideal tool for conference rooms, offices as well as for residential settings.

DESIGNER

Jörg Boner

MADE
